SO LEAN & CLEAN

WHY FROZEN

5 DAYS OF LEAN & CLEAN MEALS  
FOR WEIGHT LOSS

DAY 1 MEAL PLAN

DAY 2 MEAL PLAN

DAY 3 MEAL PLAN

DAY 4 MEAL PLAN

DAY 5 MEAL PLAN

This plan has been created from my years of experience working with clients. I understand that we all have busy lives but also have a desire to be healthy but there are certain barriers such as:

- Time
- Money
- Knowledge

I have developed a plan that takes all the above into consideration. A plan that is not about counting calories or being hungry, but about nourishing and energising the body. Awakening your taste buds to a variety of flavours and feeling the benefits of eating natural foods.

## SO LEAN AND CLEAN BENEFITS

**Skin will glow**, You will lose your food addiction, sugar makes you hungry all the time, say goodbye to this once you quit sugar.

**Weight will fall off you** - you will be proud of your leaner physique.

**You will feel happier** - When you quit sugar your energy becomes more stable, so does your mood.

**You will learn to love your kitchen being free from junk**. No more processed foods, extra spending on snacks because when you become sugar free you won't be so hungry, your body will have the nutrients that it requires and will no longer send messages out that you need more food.

**Financial benefits** - We are doing the math for you, no fluctuating vegetable /meat prices.

**Reduced cooking costs**

**More YOU time** - No time trotting around the supermarket spending on extras you don't really require.

Delivered to your door - Easy to reheat - No waste - No guessing if what you have chosen has bad additives or is really what it says on the packet.

If you are willing to make the adaptation from processed to natural foods, you will see incredible changes you and your body will love.

## Some Facts about SO LEAN AND CLEAN Fresh Frozen meals

Freezing food as a method of preservation is on the rise, and with good reason: according to a recent study by the University of Hamburg and the University of Applied Sciences in Hamburg, frozen food retains important vitamins and nutrients over a longer period of time than fresh or chilled food.

**The scientists found that the vitamin C content of frozen food stored at minus 18 degrees after a year is still at 80%. However, food kept in the refrigerator, goes down to about 60% of vitamin C lost after just a few days.**

Furthermore, the study comes to the conclusion that frozen vegetables, like fresh vegetables, can lower the risk of cancer and strengthen the immune system. In a refrigerator, more than 40% of the essential nutrients that reduce the risk of cancer are lost after a few days.

Since time and temperature are the main enemies of freshness, it is clear to the nutritionists that:

- Frozen Meals / ingredients are better than fresh because they are fresh when they are frozen
- Frozen meals are always in optimal condition
- Super-fast snap freezing process ensures that meals are as fresh and tasty as the day they were prepared
- Snap Freezing allows a manufacturer not to use preservatives, artificial colours, flavours, E-numbers or sweeteners
